

COOPERATIVE ECONOMIC INSECT SURVEY REPORT

Glenn A Salsbury, Survey Entomologist

Report 5, Volume 54

21 March 2006

GREENBUGS: Averaged 20 per row foot in Chase County and 10 per row foot in Marion County. Wheat was in the 5 tiller stage.

BIRD CHERRY-OAT APHID: Ranged from 5-10 per row foot in two fields checked in Marion County.

THRIPS: Found causing light damage to various plants in a greenhouse in Chautauqua County.

FLORIDA RED SCALE: Found on lily at a florist shop in Montgomery County. The affected plants were to be destroyed.

JAPANESE BEETLE: None were found in river birch rootballs sampled in Sedgwick County.

SPIDER MITES: Commonly found in greenhouses and florists shops on various plants.
